

What a Booking System Needs

Core Features

Calendar Integration

- Real-time calendar view (daily, weekly, monthly)
- Sync with Google Calendar, Apple Calendar, etc.
- Availability management (block/unblock time)

User Interface

- Clean, intuitive booking page
- Mobile and desktop responsive
- Branded/customizable design

Client Scheduling

- Select service/class/staff
- Choose date and time
- Optional: recurring bookings
- Confirmation notifications (email/text)

Staff & Resource Management

- Assign bookings to specific staff or rooms
- Manage staff availability
- Conflict resolution (avoid double-booking)

Payment Processing

- Integration with Stripe, Square, PayPal, etc.
- Accept deposits or full payments
- Offer promo codes or packages

Client Management

- Client profiles with booking history

- CRM tools (notes, preferences, etc.)
- Intake forms or waivers

Notifications & Reminders

- Automated email/SMS reminders
- Confirmations, cancellations, and reschedules
- Notifications for staff

Admin Features

Dashboard & Analytics

- Booking trends
- Revenue tracking
- No-show rates, client retention

Policies & Restrictions

- Cancellation/rescheduling windows
- Late/no-show fees
- Capacity limits (for classes/events)

Integration & Automation

- CRM (HubSpot, Mailchimp, etc.)
- Zapier or API access
- Membership or subscription systems

Security & Compliance

- GDPR / CCPA compliance
- Secure data handling
- Privacy policy & terms of use enforcement

Optional Add-ons

Waitlist system

Loyalty or rewards program

Multi-location support

Gift cards & promo management

Chat or messaging

Upsells (add-on products/services during booking)

Preliminary Notes

The **Petroneonline CHECKOUT module** was custom-developed by an external company that we are no longer able to contact, so it is **not a native BigCommerce component**.

We can either **replace it** (with the required changes) or **modify the existing module**.

All field labels are currently in Italian — we can provide translations internally if needed.

The activity involves both **frontend** (fields, label formatting) and **backend** (data saving, data transfer to our server).

<https://www.petroneonline.com/checkout>

The screenshot shows the checkout page of Petroneonline. The page is in Italian. At the top, there's a header with the website name and a navigation bar. Below the header, the page is divided into two main sections: 'Cliente' (Customer) and 'Spedizioni' (Shipments).

Cliente Section:

- Customer name: dlugli@skpr.it
- Modifica button

Spedizioni Section:

Indirizzo di spedizione (Shipping Address):

- Nome (Name)
- Cognome (Surname)
- Azienda (Facoltativo) (Company - Optional)
- Numero di telefono (Phone number)
- Indirizzo (Address)
- Appartamento/Edificio (Facoltativo) (Apartment/Building - Optional)
- Città (City)
- Paese (Country) - Italia
- Stato/provincia (Facoltativo) (State/Province - Optional) - Seleziona uno stato
- Codice postale (Postal code)
- Partita IVA / Codice Fiscale (Facoltativo) (VAT / Tax Code - Optional)

Riepilogo ordine (Order Summary):

- Modifica carrello button
- 1 articolo (1 item)
- 1 x Amin 21k - Italfarmacia Gusto Cacao Confezione 21 Bustine Da 15,61 Gr (1 x Amin 21k - Italfarmacia Gusto Cacao Confezione 21 Bustine Da 15,61 Gr) - €32,00
- Subtotale (Subtotal) - €32,00
- Spedizioni (Shipments) - --
- Coupon/buono regalo (Coupon/gift certificate)
- Totale (EUR) - €32,00
- Tasse incluse nel totale: (Taxes included in total):
- VAT - €2,91

Protezione Acquirenti (Buyer Protection):

- 4.83
- Eccellente (Excellent)

Three-Step Checkout with Dynamic Fields

STEP 1: Personal and Shipping Details

- First Name
- Last Name
- Email
- Phone Number
- Address
- Street Number
- ZIP Code
- City
- Province

Field suggestions (auto-complete or validation):

For fields like Address, Street Number, ZIP, City, Province, we already have **GLS's technical documentation** for their address database.

Cart Contents

If the cart contains **medications, medical devices, or homeopathic products**:

→ show field:

"Enter your Codice Fiscale to receive a tax-deductible receipt ("scontrino parlante") (optional)"

If the cart does **not** contain such products:

→ show the same field in **greyed-out style** with an **info icon**, showing on hover/tap:

"There are no deductible products in your cart."

Product type detection:

- **Medications:** MINSAN code starts with 0
- **Homeopathics:** MINSAN code starts with 8
- **Medical devices:** not identifiable via MINSAN — we may tag them using a **custom field**

STEP 2: Shipping Method

Upon reaching step 2, we want the **account to be automatically registered** in BigCommerce.

Checkbox:

"Use the provided address for shipping"

Courier selection with clear timing and pricing:

(Currently only GLS, but we want to add Amazon Shipping and In-post)

Option for delivery to a pickup point

(We already have all the necessary documentation to integrate GLS and In-post pickup points)

Additional notes for the courier (e.g., intercom info, delivery time slots, etc.)

STEP 3: Payment and Invoice (optional)

Payment methods (currently active):

- Credit/Debit Card
- PayPal
- Scalapay
- Cash on Delivery (add €5 surcharge, and display it in the cart total)
- Bank Transfer

Checkbox:

"I want to receive an invoice"

If selected, show the following fields:

- **VAT number or Codice Fiscale**
 - Validate **Italian CF** (e.g., `cf-validator` in JavaScript or `codicefiscale` in Python)
 - Validate **Italian VAT**:
 - 11 digits total
 - First 7 digits: taxpayer ID
 - Digits 8–10: Tax Office code (e.g., 001 = Turin, 003 = Milan)

- Last digit: control digit (checksum via specific algorithm)
 - Company Name
 - Address
 - Street Number
 - ZIP Code
 - City
 - Province
 - Certified Email (PEC) or SDI Code (at least one required)
-

Other Validations & Notes

Dynamic Functionality

- If the cart has no medications → do not show Codice Fiscale field
- If the customer requests an invoice → only show relevant fields
- Auto-validation of Codice Fiscale and VAT number
- Fully mobile-friendly, with clear instructions and validations

Additional UI Elements

- Display a **fixed order summary** on the right (or top on mobile)
- Clearly highlight: applied discounts, shipping cost, and total
- Clear final CTA: **"Confirm and Pay"**
- Use **clean design**, minimal text, intuitive icons, real-time field feedback (e.g., "Required field", "Invalid email format", etc.)
